

Valves and actuators

Perfect control of every process

own the flow

Chemical, food, transport, infrastructure, energy, off-shore... Whatever sector you operate in, VAPO supplies all the valves and actuators you need to control your processes perfectly. Whether it's gas, water, powder, slurry, grains, liquid glass or concrete... if it flows, you can control it with our products.

Partner for mechanical engineering

As a technical designer, engineer or mechanic, you are constantly making choices in materials and components. It is nice to have a partner who knows the valve market like the back of his hand. An advisor who can provide you with exactly the components you need for the equipment you design, build or maintain. From a simple check valve to an electrically actuated 3-way ball valve with spindle seal for high pressure in ATEX design.

At home across Europe

VAPO supplies valves and actuators from all major European brands. We can also advise you on combined applications, depending on the conditions in the process to be controlled. Moreover, we have almost all parts in stock, including spare parts for maintenance and repair. Would you like to receive documentation? We are happy to send you digital 3D step files of all parts in our range.

Custom assembly to your specs

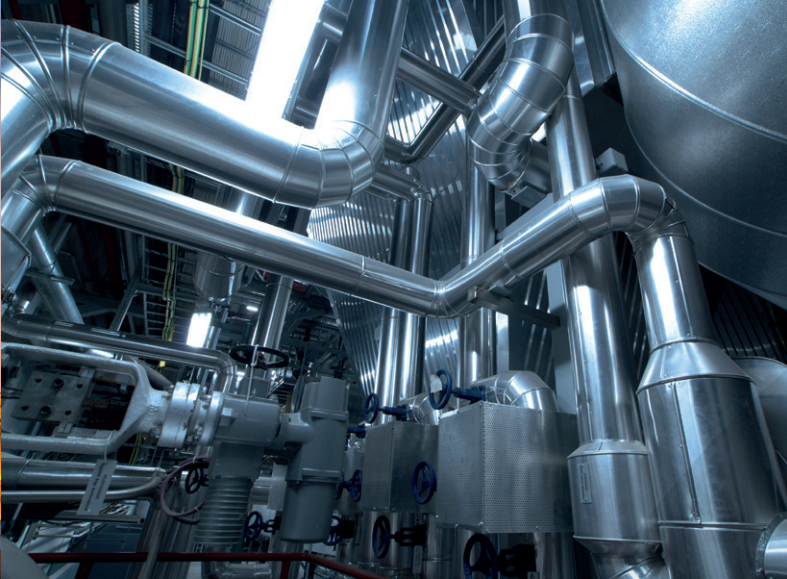

If there is no standard solution for controlling your process, we can advise you on a combination of components from different brands that together will do exactly what you need. We use a large library of CAD drawings and our catalogue to put together the most effective combination. A complete plug and play installation package, ready for use in your process.

"We always deliver on-spec, on time and on budget."

Own the flow with VAPO

VAPO Techniek has been active in the market for industrial quality valves for over 35 years: (ball) valves, butterfly valves, check valves, free-flow valves, control valves and solenoid valves. Our extensive practical experience and highly service-oriented attitude make us a valuable partner in selecting and applying the right valves for your specific needs. For more information, visit www.vapo.nl or go directly to our webshop via this QR code.

Own the flow with the best brands

As an independent valve and actuator specialist, we can advise you on the right products for your process. Because we have chosen to work with the best brands for over 35 years, you can always be assured of the highest quality for perfect control of your processes.

Ball valves

TYP	CONNECTION	FLOW	PRESSURE CLASS	CERTIFICATES	SIZES	MATERIAL	CONTROLS
 A10/ A20	BSP	Full	PN16-20-40	2.1	1/4" - 4"	Brass
